Disclosure:

DMC Senior Behavioral Healthcare, Silver Lights Care Center, is a secured 12 bed unit, located inside DMC in Fitzgerald, Georgia. We specialize in the behavioral health care of adults 55 years of age or older.

*** Exclusionary Criteria includes:

- Complicated medical conditions that preclude active participation
- Dialysis
- Communicable disease that would place other patients or staff at risk
- Repeated admission without evidence of improvement or change

If it is determined that our facility is appropriate for your referral based on the accompanying information, we will begin the admission process. We appreciate your cooperation while addressing all areas of the referral checklist--your knowledge is the first step in creating a successful treatment plan.

Once your referral is received, our team will conduct a thorough review for admission appropriateness. If the prescreening demonstrates 'psychiatric necessity' for admission, the next step is medical clearance, if required. Medical clearance may be required prior to admission.

Additionally, please be aware that the demand for services fluctuates and immediate bed availability is not always possible. If that is the case at the time of your request, we can place your referral on an admission waiting list and work to have the patient admitted as quickly as possible (usually within a couple of days), or advise for alternative treatment options. Moreover, it may be determined at the time of the medical clearance that the patient has an acute medical issue which precludes behavioral hospitalization—if indicated, medical treatment will be implemented at DMC ER/inpatient medical unit or transferred to a higher level of care if medically necessary.

We, at DMC Silver Lights Care Center, are here to meet your needs and those of your patients, so please do not hesitate to contact our staff directly with any questions or concerns at 229-424-7268. We truly value all of our referral sources and understand the magnitude of this request. Lastly, if the safety of the patient or others is jeopardized, immediate transfer to your local emergency department should occur.
